

# Lillibrook Manor Wedding Venue

## Halo Emergency Lighting

We were contacted by the owners of Lillibrook Manor, one of the most picturesque wedding venues in Berkshire. With its sprawling 15 acres nestled in the English countryside, this 15th century building is regularly hired for private parties and weddings.

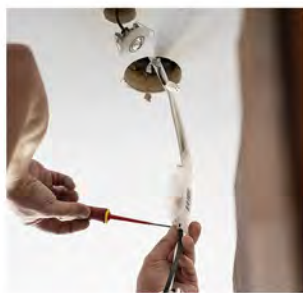

The owners mentioned that the green emergency lighting indicators in the bedroom suites were deemed to be bright by its residents and were causing disturbed sleep. They obviously want to provide the very best experience for their residents, mindful of staying within the requirements of the emergency lighting standards.

They had read about our emergency LEDs, specifically designed for hospitality and healthcare. The green charge indicator is designed to dim with the ambient lighting of the room therefore allowing a restful night's

### 01. Original Halo

We arranged for an engineer to visit the site and swap out the original emergency LEDs for our versions with the dimming indicator.

### 02. Replacement

Due to the plug and play nature of the product, the work was carried out within a couple of hours.

### 03. Dimming Halo

The ambient light dimming was tested and the owners of Lillibrook were delighted with the outcome. Their residents can now sleep without light pollution disturbance, whilst the building managers are in keeping with regulations.
